- ❖ Work as a teacher assistance at CSE department at IUB
- ❖ Volunteered in physics Olympiad
- ❖ Managing and volunteered in tech-fest at IUB -2019

Write a Project Report On Line Following Robot— At IUB Teach-Fest-2019

One of the most important aspects of robotics is line tracking. A line following robot is an autonomous robot capable of following both a black line that is drawn on the surface consisting of a contrasting color. It is designed to automatically move and follow the line. The robot uses optical sensor arrays to identify the line, helping the robot stay on track.

SKILLS

Java

C++

LANGUAGES

- Bangla(native)
- English (secondary Language)
- French (Done elementary French course at University)
